CONTROLS IN MOTION™

**WE'RE NOT JUST CREATING
REMOTE CONTROLS,
WE'RE CREATING
A SAFER WORKPLACE**

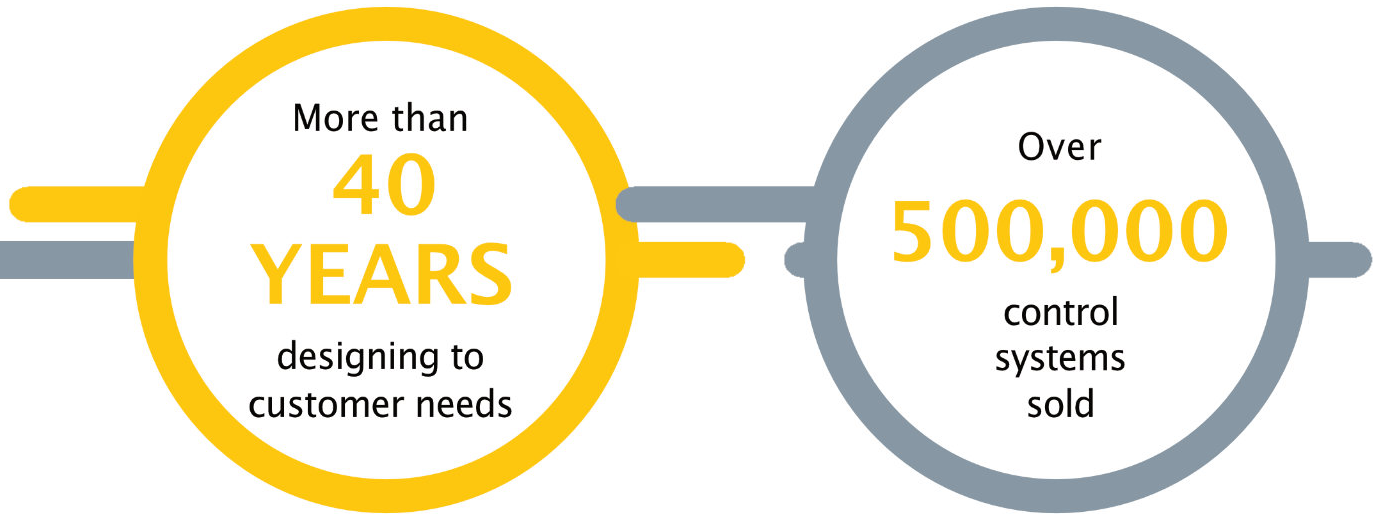

HETRONIC

OUR EXPERIENCE WILL IMPROVE YOUR EXPERIENCE

More than 40 years of creating new tech that elevates the user experience.

Staying relevant and at the top of the market for over 40 years has only been possible through the continuous development and application of new technologies. Our engineers actively design-in new technologies and features that optimize safety, productivity and reliability for the user of wireless/wired control systems.

EXPERIENCE

MATTERS

HETRONIC

40 YEARS OF HISTORY AND SUCCESSES

1982

Hetronic is founded, **Heckl Electronics** is born, in the same year produces its first remote control **Model GR.**

1988

Heckl Electronic became **Hetronic Steuersysteme GmbH** and introduces the transmitter **GL Version** with SMD technology and gets the TÜV Safety certificate.

1991

Hetronic Steuersysteme launches the **TG, HH, ERGO** and **GL** transmitter systems becoming the standard for tower cranes.

1992

Hetronic Steuersysteme gets **ISO 9001** certification, and surpasses the production of **20.000 systems annually.**

1994

Hetronic receives certification for **Explosion-proof EX radio controls ATEX.**

2000

Establishment of **Hetronic international** in Oklahoma City, **USA** and continues to expand internationally with new offices in **Malta Ecuador, Japan** and **Australia**

2008

Hetronic International Inc. is acquired by **Method Electronics Inc.** (NYSE: MEI), joining part of an innovative International group with over \$500M in annual revenues.

**2009
2010**

Hetronic gets UL/CSA certifications for **Ex** systems subsequently approved according to **IECEX** standards.

**2015
2019**

Hetronic opens factory production in **Samaya, Egypt** and **Monterrey, Mexico**, and **Italy.** Certifies **Ex** batteries with extended range from -30°C to + 70°C, introduces to the market the innovative **ERGO S** keypad equipped with colour TFT display and mini joystick proportional and the brand-new series **NOVA** equipped with 4.3" colour display.

Hetronic extends its global presence to a total of **50 countries.**

2002

Hetronic enters new markets, expand families with the new **NOVA, POCKET** e **MFSHL** series. In the same year constitutes **Hetronic Canada** and **Hetronic Asia.**

HETRONIC TODAY

Hetronic continues to deliver on its commitments to elevate the **safety** and **performance** of our products to deliver best-in-class end user experience. Investments continue in developing **new technologies**, expand the range of products, extending vision applications with leading-edge architectures of its controls thanks to the constant research of a global team of developers and to the Synergy with the parent company Methode Electronics. Continuous improvement and the first-in-the-market application of **"Automotive Processes"** in manufacturing operations and the opening of new departments within the production plant of the **METHODE ELECTRONICS Group;** USA / EUROPA / CHINA / MEXICO / INDIA

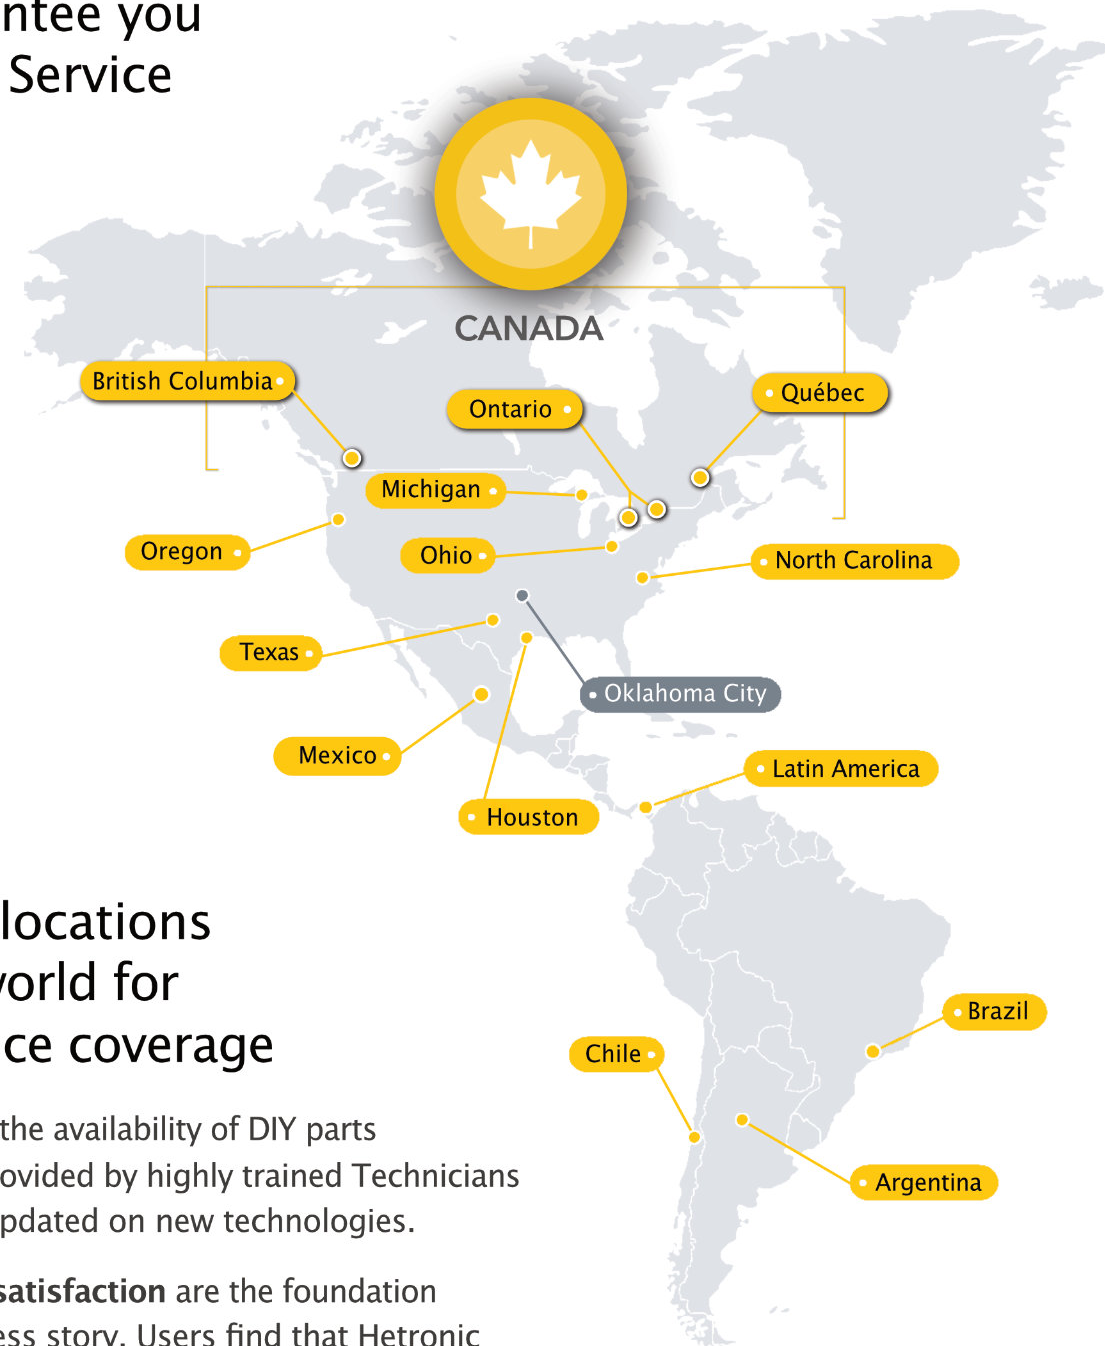

DECADES OF

LEADERSHIP

GLOBAL BUT LOCAL

Everywhere in the world to guarantee you the best Service

51 strategic locations around the world for assured service coverage

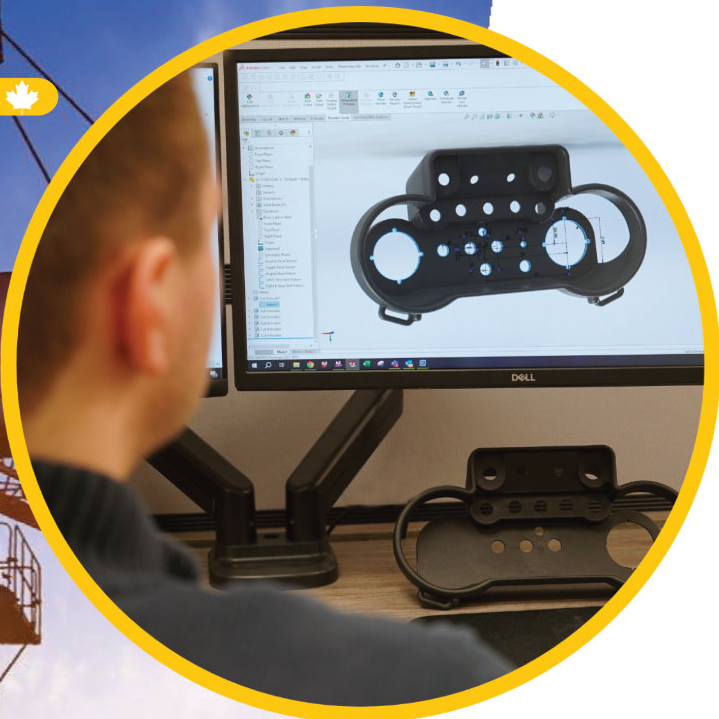

Hetronic guarantees the availability of DIY parts and expert service provided by highly trained Technicians who are constantly updated on new technologies.

Customer **trust** and **satisfaction** are the foundation of the Hetronic success story. Users find that Hetronic is an active partner that appreciates the importance of user experience and always strives to improve **Safety**, **Performance**, **Reliability** and **Ease of Service**.

GLOBAL PERSPECTIVE

LOCALLY FOCUSED

HETRONIC CUSTOM-MADE SYSTEMS

Designing and engineering systems to the customer's specific needs is a value-added service at Hetrican Canada.

Get the most out of your remote applications by contacting our **Canadian-based** engineering and technical team.

Our team will engineer and fabricate an outstanding radio remote system custom-tailored perfectly to your unique situation and needs.

Expect superb performance and an intuitive operator interface.

Colours available for all models:

HARDWARE

Buttons, selectors, potentiometers, feedback LEDs, rotary selectors, selectors with mechanical lock, coded keys, proximity sensors, dead man, capacitive sensors, encoders, LED bars, buzzers, special joysticks, special switches, and endless futures on request.

DISPLAY

Colour or Monochrome Display:
120x32 mm, 70x32 mm
Color Display: 2.4", 2.8", 4.3",
W-Lan (video feedback).

JOYSTICK

Proportional/Digital,
Cross, Linear, 1, 2 & 3 axis,
multifunction joystick.

JUST THE WAY YOU

WANT IT TO BE

LIMITLESS APPLICATION

With over half a million Hetricnic radio remote systems having been used across the globe, our engineers, designers and application techs have developed effective solutions for every type of use.

In fact, it makes us better – we take learnings and best-practices from diverse applications to provide new safety, performance and user interface features across all our devices.

EX PROOF REMOTES

Certified systems for Hazardous Areas

A COMPLETE RANGE of EX classified transmitters and receivers. Both models offer buttons or joysticks, displays, feedback LEDs, IP66 protection, wireless/wired communication. GRP ATEX, EXd IECEx, EXDe.

COMPATIBLE For Zone 1/2 2G 3G, IIB IIC, Zone 21/22, M1/M2 T4/T6, Class 1/2 Division 1/2

OWNERSHIP CERTIFICATE ATEX, IECEx, INMETRO, UL / CSA / EAC / KC-KCS CCC / ATEX -30°C.+70°C.

BETTER PERFORMANCE

A COMPLETE RANGE FOR EVERY APPLICATION

Ergonomics, lightness, ease of use, robust materials, and extremely well thought-out designs are what sets Hetronic devices apart. We've thought of everything, with technology that is adaptable to any situational requirement and area of operation.

COMPREHENSIVE

HANDHELD SERIES

From 2 to 11 buttons, mechanical switches, potentiometer, proportional joystick, monochrome display, colour display, LEDs, buttons with backlight and much more for your unique needs.

COMPLETE SERIES
